

CS-24-333 7th Meeting

Date: 12/01/2023

Notes:

The login page will be for both admins of website and users

For login page, depends on how we implement it but we could have separate sections.

Just have one login page.

Good about page.

When coding the message us box in contact us page, make sure the message box allows paragraphs and not just a line

Use VCU colors and accent colors to go with the AGIE project logo:

<https://webstandards.vcu.edu/requirements/branding/>

https://brand.vcu.edu/content/index/guid/primary_palette_1?parent=57

Tasks:

Shows the stakeholders the website

Add a page to the wireframe about what happens when you click the link to document title

When you click or hover over the title, there should be a summary that pops up or something that shows what filters the paper applies to.

Maybe add this to the right of the papers in page result page

Add save or back button to user profile

Put generic vcu email for contact us (agie@vcu.edu) and fake phone number. Put the VCU address

Will need a developer document about technology specifications. Another document also from the user standpoint. User document will be written like a tutorial, which will be posted to github. Can also be made in github written in markdown. Our documents will be very short.

Examples:

<https://vcuwrightcenter.github.io/TopExApp/manual>

<https://vcuwrightcenter.github.io/TopExApp/installation>
