CS-24-333 5th Meeting

Date: 11/3/2023

Notes:

Focus on papers that have intervention and methods for change
- Don't include papers that don't have solutions

Keyphrases/tags can be manually gathered, but could later be automatically done

Can specify demographics in tags like: k-12, faculty, leaderships, postdoctoral, undergraduate

Checkboxes for metadata to filter through papers

Speed and cost can be filtering options too

Older and newer papers are fine

PubMed is good source to gather papers

Tasks:
- Send recurring meeting zoom link
- Create tag options
  - Gender
  - Race
  - Ethnicity
  - Socioeconomic status
- Create small summaries of papers to remember each one
- Can pull statistics too, but will be outcome statistics from the solutions implemented
- Find 5 papers that will be included in the prototype
  - Covering broad range of filters/tags with variety of demographics
- Create a google spreadsheet with a title of each of papers
  - Columns with tag names and if paper fits into that category, put 1 otherwise 0
- Start designing the website

Next Meeting:

Weekly meeting with Dr. Olex every Friday at 12:30 or 12:00
